Department Name	Name	Text(80)		✓
Last Modified By	LastModifiedById	Lookup(User)		
Owner	OwnerId	Lookup(User, Group)		✓

Department Object	Field label	Field type
	Department code	Text

MILESTONE: 6

Import Departments

First you need to download the reference

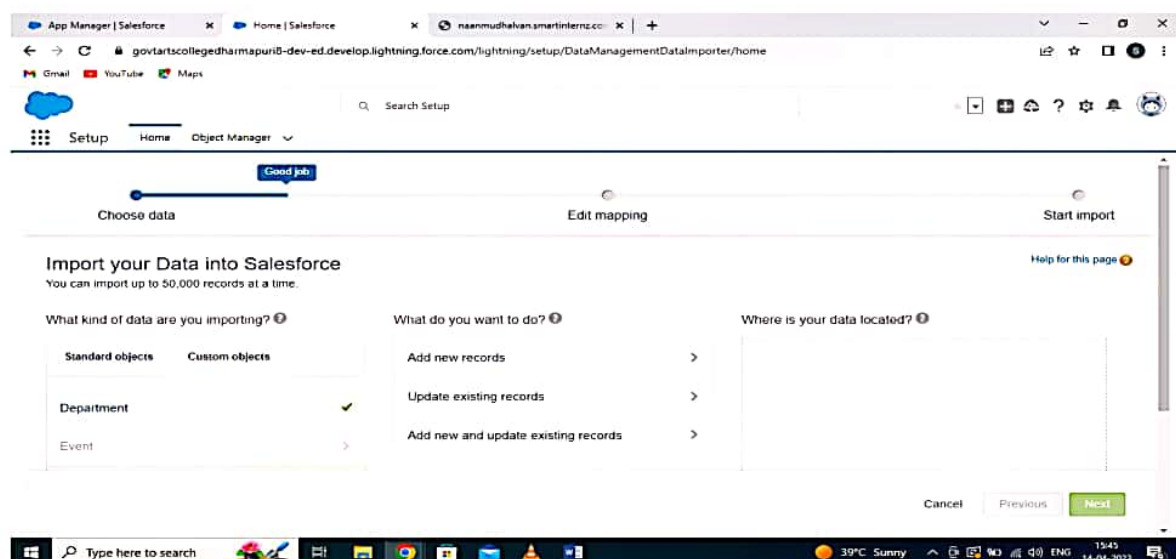

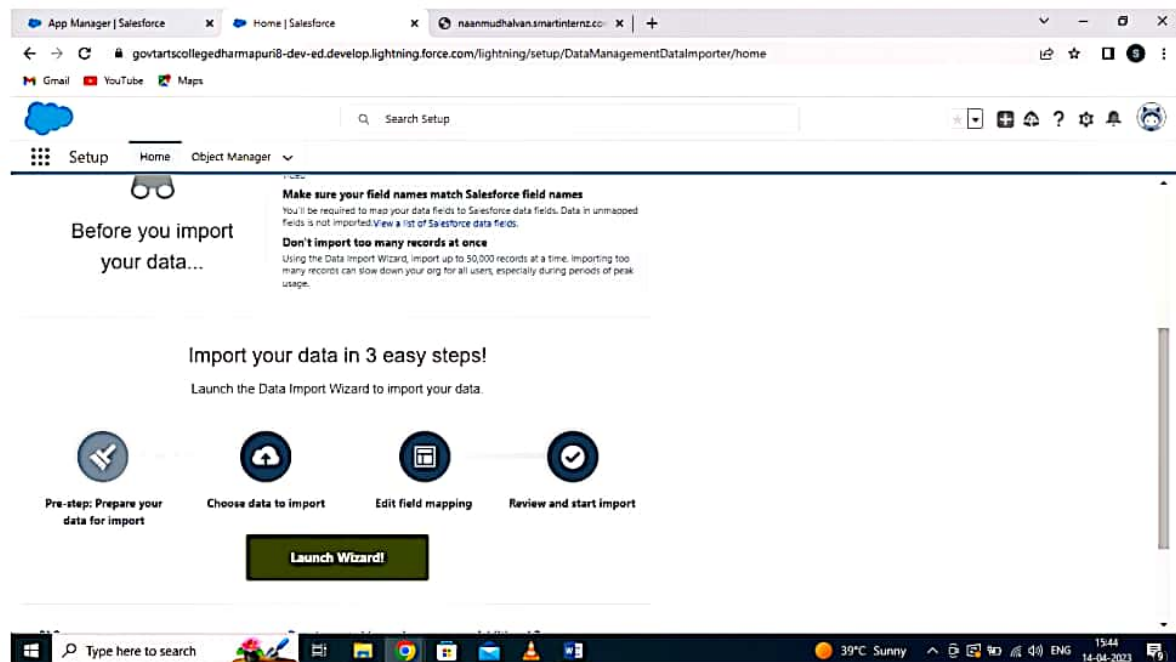

file <https://developer.salesforce.com/files/travelappworkshopfiles.zip>

Click on home page and search for data import wizard in the quick find box and click on data import wizard.

Click on Launch wizard.

Click on custom objects.

Click on Department and import department file in CSV file.

MILESTONE: 7

Customization of UserInterface

Create user and Set Up Approvals

- Enter username in the quick find box and select users
- Click new user.
- For username follow the instructions **First name<Your last name>@our Company>.com**
- **The email must be real.**
- Give the role as CEO, Profile as system administrator and license as salesforce.
- Set your manager as approver.
- Click save.

MILESTONE: 8

Creating Travel approval object page layout

The screenshot displays the Salesforce Setup interface for configuring the 'Travel Approval' object page layout. The browser address bar shows the URL: `govtartscollegedharmapuri8-dev-ed.develop.lightning.force.com/lightning/setup/ObjectManager/0112w000003bky0/PageLayouts/00h2w00000152ZNAAZ/view`. The page title is 'Travel Approval Layout'. The left sidebar contains navigation options: Details, Fields & Relationships, Page Layouts (selected), Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, and Search Layouts. The main content area shows the 'Travel Approval Layout' configuration. It includes a 'Quick Find' box for field names and a table of fields. The fields table has columns for 'Field Name' and 'Field Type'. The fields listed are: Section (Field Type: Section), Destination State (Field Type: Text), Purpose of Trip (Field Type: Text), Total Expenses (Field Type: Text), Last Modified By (Field Type: Text), Record Type (Field Type: Text), Travel Approval # (Field Type: Text), Created By (Field Type: Text), Out of State (Field Type: Text), Status (Field Type: Text), Trip Start Date (Field Type: Text), Department (Field Type: Text), Owner (Field Type: Text), Status Indicator (Field Type: Text), and Trip End Date (Field Type: Text). Below the fields table, there is a 'Travel Approval Sample' section with a 'Highlights Panel' and 'Quick Actions in the Salesforce Classic' section.

Field Name	Field Type
Section	Section
Destination State	Text
Purpose of Trip	Text
Total Expenses	Text
Last Modified By	Text
Record Type	Text
Travel Approval #	Text
Created By	Text
Out of State	Text
Status	Text
Trip Start Date	Text
Department	Text
Owner	Text
Status Indicator	Text
Trip End Date	Text

From the object Manager Search for the travel approval object and click edit.

Click on page layout and click edit.

Drag section from the top of the pane to the lower pane directly below the Information section.

When you dragging over the page you get a visual indicator of where you can drop the new section.

Name the section Trip Info.

Drag purpose of the trip field, Trip start Date, Trip End Date, Out of state, Destination State and Department Field.

Click on Save.

MILESTONE: 9

Add A Business Logic To Travel App

- Create the validation rule:
- In the object manager click on the travel approval object and click on validation rule.
- In the error condition formula enter `Trip_end_Date__c < Trip_Start_Date__c`.
- For error location select field and pick trip end date as the location error.

Create Rollup Summary Fields

- Create a new Total Expenses field in Travel approval object.
- Select the data type as Roll up summary data type.
- Configure the roll up calculation:
- Summarized object: Expense items
- Roll up Type: SUM
- Field to aggregate: Amount
- Field Criteria: All records should be included in the calculation.
- Click next click save.
- Create the Formula fields:
- First we need to upload the StatusImages.zip
- Click custom code | Static Resources
- Click New.
- Name: StatusImages
- File: StatusImages.zip
- Cache Control: Private
- Now select the travel approval object.
- Create a new field. select formula data type.
- Field label as Status Indicator and Formula return type as text.
- Copy and paste the following formula in the formula editor.

```
IF(ISPICKVAL(Status__c, 'Approved'), IMAGE ("/resource/StatusImages/thumbs-up.png", "Accepted", 20, 20),
```

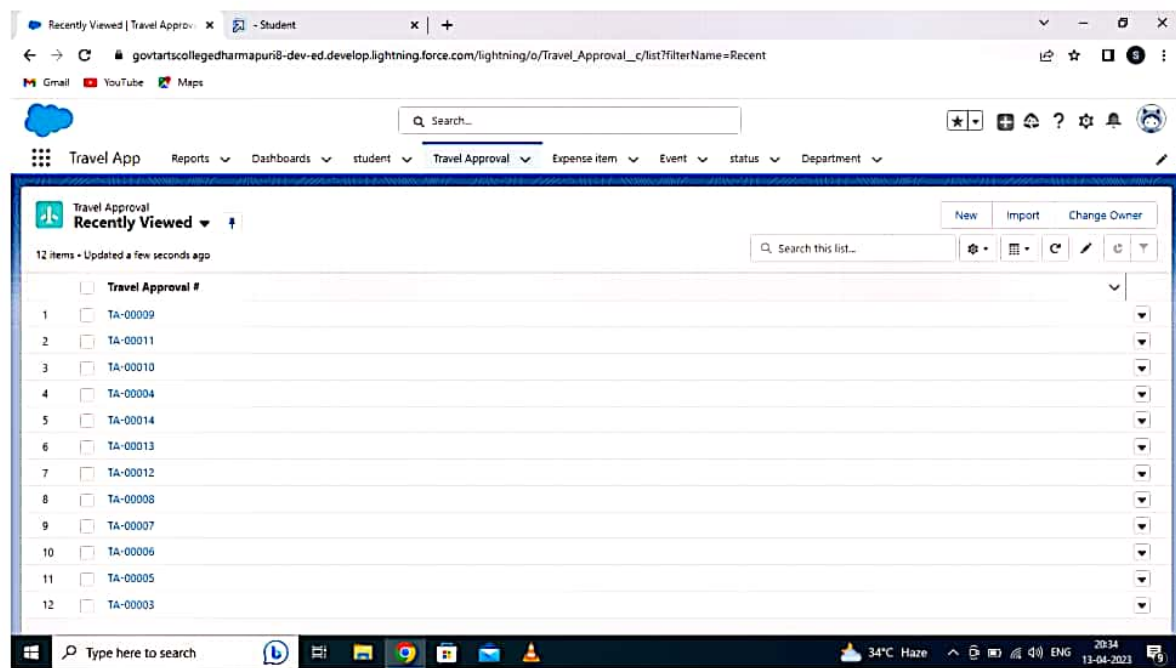

- IF(ISPICKVAL(Status__c, 'Rejected'),IMAGE("/resource/StatusImages/thumbs-down.png","rejected",20,20),IMAGE("resource/StatusImages/draft.png","IN-Process",20,20)))
- Click Next, Next save.

MILESTONE:11

Reports

Click on new report.

Select Report Type from category and customize your report then save or run it

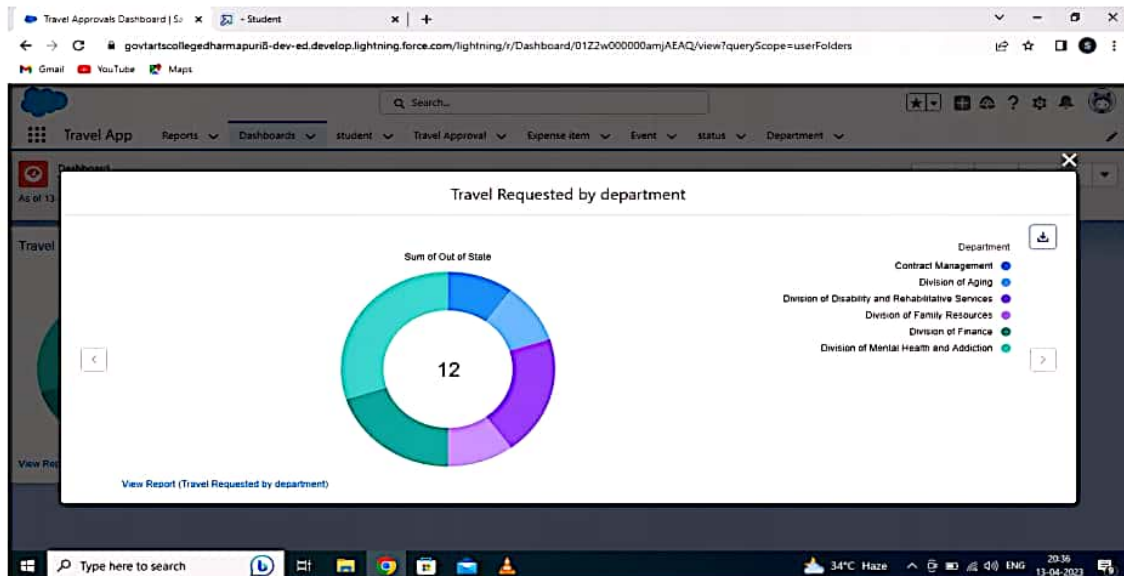

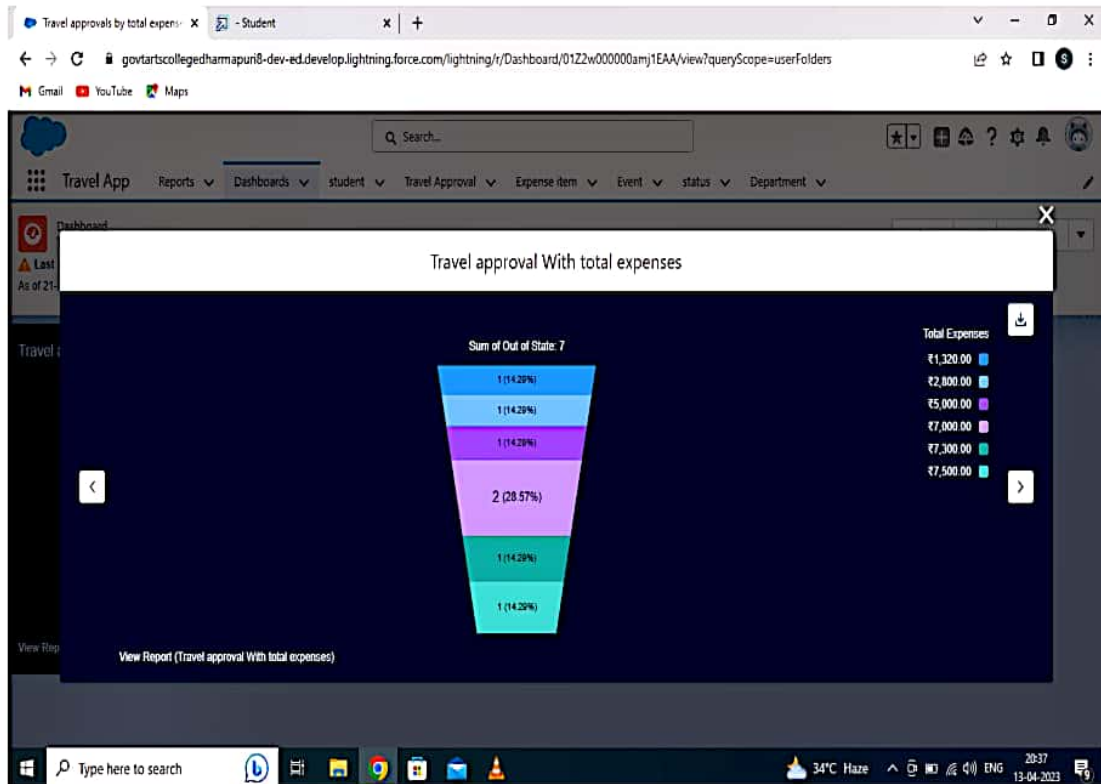

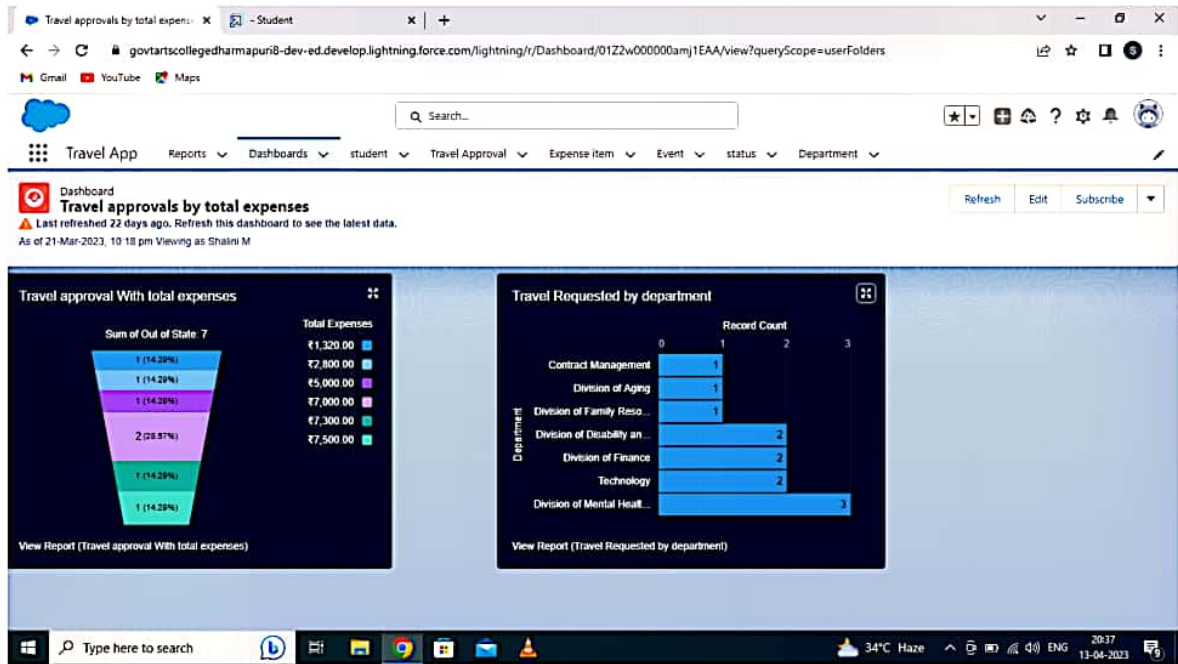

MILESTONE: 11

Dashboards

Creation Of Travel Approval Dashboard

- Click on dashboards.
- Give Your Dashboard Name and Click on Add Component
- Select the report which you have created.
- Select any of the chart and you will see the graph.

5. ADVANTAGES AND DISADVANTAGES

Advantages:

1. Travel Apps and websites provide cost savings and convenience to travellers.
2. By using them you can find the best deals, book trips, and simply plan your travel with just a few clicks.
3. Recent Travel apps and websites have completely changed the travelling experience of the traveller.

Disadvantages:

1. Snow Software company surveyed 3000 global workers across the US, UK and Asia Pacific about travel tech experience. The Survey showed that 59 percent of the traveller had travel issues caused by technology in one form or another.
2. Price was the biggest issue for the many travellers. Travel booking sites generally aggregates flight, lodging, and other costs in real-time across the countless airline carriers and hotels.
3. Many of the times the Travel apps and websites are not best either. The survey finds another 40 percent of the respondents said that they have to deal with a confusing or slow travel website.
4. More 27 percent of respondents said that they only find limited options for the travel they wanted to book.

6. APPLICATIONS

- ✚ A Travel planning app is an application for booking travel reservations, tracking loyalty points, and browsing travel packages. A travel planning software package can be used by travel agencies, travel suppliers, and consumers.
- ✚ A travel app gets users a direct answer to everything they need to know about the planning a vacation- the way to reach there, flight/train ticket details, hotel etc.
- ✚ Travel application is one place to get every service regarding their travelling.
- ✚ Easy to spread information about travelling.
- ✚ Easy transaction.
- ✚ Digital customer, Digital services.

7. CONCLUSION:

From the travel approval application Project, Me and my team learned a lot about salesforce. On working for the Project, we learned many things and get a new experience. The above advantages and disadvantages of this app may help you to know about this project. The applications of this app in the daily life will helps you a lot in the travelling. This application makes easy way to apply for the trip.

Thank you so much for giving me this wonderful opportunity to learn new things and get some knowledge about the travel application.

8. FUTURE SCOPE:

The Disadvantages like technical problems must be reduced to make people find a easy way to apply for the trip.

By using the App you can easily book for the travelling and decide where you want to go and stay. You can choose things for lowest prices. You can complete the trip by just few clicks.

Thank you
